### DETAILED ACTION

1. The location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1644, Group 1640, Technology Center 1600.

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-10 and 15-21, drawn to methods of inducing transplant tolerance, classified in Class 424, subclass 130.1. and Class 514, subclass 8.

II. Claims 10-14, drawn to compositions comprising a costimulation blockade agent, classified in Class 424, subclass 130.1 and Class 514, subclass 8.

3. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)).

4. Because these inventions are distinct for the reasons given above and the search required for any group from Groups I-II is not required for any other group from Groups I-II and Groups I-II have acquired a separate status in the art because the searches are not co-extensive and encompass divergent subject matter, restriction for examination purposes as indicated is proper.

5. In addition to choosing from Groups I and II; this application contains claims directed to the following patentably distinct species of the claimed Groups I/II: wherein the costimulation blockade agent is:

- A) anti-CD40 antibodies,
- B) anti-CD40L antibodies,
- C) anti-B7 antibodies,
- D) anti-CD28 antibodies,
- E) anti-CTLA-4 antibodies,
- F) B7-Ig and soluble extracellular domain proteins thereof,
- G) CD28-Ig and soluble extracellular domain proteins thereof,
- H) CD40-Ig and soluble extracellular domain proteins thereof,
- I) CD40L-Ig and soluble extracellular domain proteins thereof,
- J) CTLA-4Ig and soluble extracellular domain proteins thereof,
- H) costimulation blockade drugs or
- I - ?) combinations thereof as it reads on the recitation of "at least one".

These species are distinct because their structures and modes of action are different.

Given the recitation of "at least one"; if applicant intends to elect a combination of "costimulation blockade agents"; then applicant should indicate accordingly.

Serial No. 09/576944  
Ari Unit 1644

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 15 and 16 are generic.

6. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

7. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gambel whose telephone number is (703) 308-3997. The examiner can normally be reached Monday through Thursday from 7:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.
